Report on activities of the Board of Directors

The Year 2022 ended with further disappointing news for equity investors. The MSCI World index ended December down -4.34 %, meaning an annual performance of -19.46% (or -14.39% if denominated in EUR). U.S. stocks did even worse in the last month of the year, with the major indexes in the red, progressively to their strategic composition. In fact, at the end of December, the DJIA30, SP500, and Nasdaq performed -4.07%, -5.09%, and -8.73%, respectively, ending the year with performances of

-3.03%, -14.37%, and -28.88% (in EUR), respectively. This shows that in 2022 the value approach did much better than the growth approach. European equities, like U.S. equities, also performed negatively in December, with the main index, the Eurostoxx 50, losing -4.34 % on a monthly basis and ending the year with a result of -11.74%.

The only index among the developed markets to end the year on a positive note was the FTSE 100, which concluded with a fractional gain (+0.91 % in local currency but equivalent to -4.12% in EUR), although it lost -1.60% in December.

Emerging markets also finished the last month of the year losing percentage points, with the MSCI EM index losing -1.64% (on a YTD basis it closed with a strongly negative result of -17.48% in EUR). The Hang Seng stood out, which gained +6.37%, although it gave up -10.18% year-on-year (in EUR). It should be remembered that the Honk Kong index is at the center of a bullish trend that began in November. Regarding thematic indexes, 2022 was dramatic, especially for securities related to REITS, robotics, and cybersecurity, while only the infrastructure and solar energy sectors closed positive. In particular, the solar sector ended positive in spite of a terrifying performance in December (-11.92 %). Overall, thematic investments have been largely negative over the past month. Even the MSCI World Health Care, which is known to be a defensive investment, dropped -1.26 %. Fortunately, 2023 began with a turnaround for equities, which started in the green. It should be noted that emerging markets and Europe are currently outperforming U.S. equities. In the government bond segment, with the exception of Mexico, which benefited from increased export activity, all major 10-year bonds ended the year in the downside, and December's performance continued to contribute unfavourably. Treasuries closed the year with a performance of -10.70 % (in EUR), with a change of +26.94 bps in December, while the Bund, which should be considered the risk-free investment for the European investor, closed the year with a performance of -19.00% and a change of +64.10 bps in December. Omitting the performance of Turkey, which is going through a challenging period not only from an economic-financial perspective, the worst performance came from the UK (-24.79% in EUR, +56.10 bps in December). Australia closed flat, while the Asian and emerging market segments posted moderate declines. Mainly in China: on a YTD basis it lost -4.15 %, a relatively decent result. There is clear evidence that the main driver in year 2022 was the restrictive monetary policy pursued by major central banks to fight against inflation, which impacted the segment severely. Concerning the ex-government segment, despite the strongly negative results on a 12-month basis (inflation linked bonds and green bonds suffered the most), during December, following the continuous liquidity drain carried out by central banks over the course of the past year, it showed a positive performance. The explanation could be found in widening spreads, which made such investments more appealing, mainly in Europe.

Like equities, the bond segment also had a good start in 2023, continuing to exhibit that positive correlation that had caused people to be suspicious of the traditional 60/40 portfolio. In the currency market, the dollar gives up a few points against other global currencies, with the dollar index ending December with -2.29 %, but closing the year strongly in the positive (+15.03% in EUR). Both the Euro and the Yuan and the Yen are strengthening against the global reserve currency.

The Year 2022 was without any doubt a year of excellent performance for commodities, with the exception of those linked to the industrial sector, such as aluminium and coal, which largely corrected with the contraction in industrial production. Precious metals (gold, silver, and platinum) performed the best on an MTD basis. Despite the sharp correction in coal (-18.15 %) and especially natural gas (-

34.36 %) in December, these two commodities have seen their prices rise at impressive rates since the outbreak of the war between Russia and Ukraine. In fact, on an annual basis and in EUR terms, natural gas prices increased by +19.52 % and coal prices by +76.47%.

Report on activities of the Board of Directors (continued)

SELECTRA INVESTMENTS SICAV - J. LAMARCK BIOTECH

Implemented investment strategy

The main objective of this Sub-Fund is to profit from increasing share prices in biotechnology. The focus is on mature top-tier biotech companies with attractive pipelines of products in development in single or numerous markets.

In 2022, the performance of SELECTRA INVESTMENTS SICAV - J. LAMARCK BIOTECH was -4.49% (share class A), with a volatility of 27.47% (20 days).

The risk profile of the Sub-Fund has been stable and did not migrate to another risk rate.

Market impact and considerations during 2022 for the asset class:

2022 was a year full of challenges, and the U.S. economy and stock market struggled in 2022. Economic uncertainty with China's zero covid policy, the effects of the Russia/Ukraine war and the highest inflation since the eighties, creating hawkish monetary policy tightening by the Federal Reserve, the S&P 500® index was down 19.4%, and the Dow Jones Industrial Average decreased by 8.8%. But the Nasdaq suffered the most with a substantial 33.1% decline, with some of its most significant components, such as Amazon, Meta and Tesla experiencing sharp declines of 50% or more during this downturn. The Nasdaq Biotech Index kept up relatively well in 2022, with a performance of -10.9%. One reason for the relative stability is a recent surge in merger and acquisition deals between biotech companies and large pharmaceuticals. In particular, Pfizer's acquisition of Biohaven announced in May, followed by other merger and acquisition agreements between GSK and Affinivax, Amgen and Chemocentryx and Horizon and Pfizer and Global Blood Therapeutics all show signs of stabilisation in biotech stocks.

2022 was also the year of transition from Trump to the Biden administration, and the industry took a cautious stance. The year has been marked by a few surprises in policy that have negatively affected investor sentiment. Anyway, the impact of the biopharma industry on our lives cannot be overstated. Lives have been saved as the pandemic continued, families reunited, businesses restored, and economies rebuilt.

Report on activities of the Board of Directors (continued)

As of 31st December 2022, the top holdings of J. Lamarck Biotech are the following:

- Gilead Sciences Inc;
- Biogen Inc;
- Alnylam Pharmaceuticals Inc;
- Biomarin Pharmaceutical Inc;
- Alkermes Plc.

Summary of relevant investments and divestments in the Biotech compartment that occurred in the period:

	TOP 5		
Buy	INTELLIA THERAPEUTICS INC	-1.014.773,76	USD
Buy	DENALI THERAPEUTICS INC	-981.780,80	USD
Sell	REGENERON PHARMACEUTICALS	1.082.412,79	EUR
Sell	BAVARIAN NORDIC A/S	1.237.545,22	USD
Sell	REGENERON PHARMACEUTICALS	1.322.699,02	USD

In April and May, the portfolio manager increased Denali therapeutics and the minor positions in Crispr technology in the portfolio as they traded substantially lower in a volatile market.

USD 981,780.80 was added to Denali, resulting in a share of 2.51% of total assets.

USD 1,014,773.76 was added to Intellia Therapeutics Inc (4.06% of assets).

To cover these trades, we advised decreasing Regeneron Pharmaceuticals as it was approaching the 10% threshold (9.63% of total assets) after strong stock performance thanks to its Covid medicine. For the same reason, we advised selling Bavarian Nordic (5.27% of assets). In October, we sold more Regeneron Pharmaceuticals to honour a redemption.

Contribution of winners and losers during 2022

	Тор 5
40,14%	ALNYLAM PHARMACEUTICALS INC
31,50%	VERTEX PHARMACEUTICALS INC
25,05%	JAZZ PHARMACEUTICALS PLC
24,12%	IONIS PHARMACEUTICALS INC
18,23%	GILEAD SCIENCES INC

	Last 5

-66,59%	EDITAS MEDICINE INC
-63,44%	2SEVENTY BIO INC
-58,38%	CARIBOU BIOSCIENCES INC
-58,35%	ARVINAS INC

The Sub-Fund has been weathering the storm in 2022 even as we saw significant price swings in some holdings. The mid-and top tier Biotech companies beat the smaller ones this year.

Alnylam Pharmaceuticals (NASDAQ: ALNY) added 40.1% this year after the RNAi therapeutics company said that its Phase 3 trial for Onpattro reached its primary goal in transthyretin-mediated (ATTR) amyloidosis with cardiomyopathy. The drug, already indicated in the U.S. for adults with polyneuropathy of hereditary transthyretin-mediated amyloidosis, also demonstrated encouraging safety and tolerability.

Report on activities of the Board of Directors (continued)

Vertex continues to deliver with its cystic fibrosis drug Orkambi, also known as lumacaftor/ivacaftor, as the FDA granted label expansion for the drug to add younger children.

Vertex can reach double-digit annualised returns in 2023 and beyond.

Jazz Pharmaceuticals saw double-digit gains this year on multiple catalysts as they continued to beat earnings consensus and guided revenue for 2002 at \$3.5B to \$3.7B. Their goal is to generate \$5B within three years and the approval of at least five additional novel products by the end of 2029.

Ionis Pharmaceuticals increased 24.1% this year; the U.S. Food and Drug Administration granted priority review to Tofersen, a therapy developed by Biogen and Ionis for the treatment of patients with lateral sclerosis amyotrophic disease (ALS) characterised by defects in the gene encoding superoxide dismutase 1 (SOD1), an essential enzyme for the cell that intervenes in the defence mechanisms against the oxidising agents. The FDA has accepted the companies' application for approval and is expected to take one decision by 25th January 2023. Under priority review, the FDA's goal is to act within six months, compared to 10 months for the standard review.

Gilead Sciences' stock increased substantially at the end of October after the approval of Yescarta, a treatment for large B-cell lymphoma and high-grade B-cell lymphoma and after it raised full-year 2022 Outlook to \$25.9B - \$26.2B, followed by upgrades from Piper Sandler and Barclays.

CRISPR stocks, like Intellia, Editas and Caribou, had a stellar performance in 2020 and 2021 but were among the worst performers within the Sub-Fund this year. CRISPR are early-stage biotech companies with enormous potential but are still years away from having commercial products available to patients. First, safety concerns have to be addressed, as we have seen with Intellia: The company published extraordinary results in September in a rare and deadly swelling disorder, but NTLA has been trading lower since on new safety concerns as one patient experienced slightly elevated liver enzymes. The main reason for Arvinas stock trading lower is a lack of catalysts in an extremely volatile stock market; ARVN stock may bounce back as soon as positive data are communicated for its pipeline. 2Seventy Bio traded lower as well but did not have any material impact on the biotech portfolio as it represents only 1% of assets under management.

Outlook as we advance 2023:

We expect global growth to deteriorate until July 2023. Markets will then increasingly focus on the recovery beyond, although investors shouldn't expect everything to go "back to normal" immediately. Higher inflation and a weaker economic environment mean that not all companies will thrive. The Fed could deliver a "soft landing" with the labour market likely to prove resilient. Warm weather could save Europe from an energy-cost-induced recession. China has basically ended the lockdowns that have slowed the recovery from the pandemic. We expect Chinese consumers to revenge buy consumer goods, a pattern we have seen in the rest of the world after easing Covid restrictions. This means higher inflation is here to stay for the rest of 2023, with the FED and the BCE acting with tightening monetary policy.

A positive for the markets in 2023 could be Russia and Ukraine beginning peace talks. At this moment, there is no indication for this to happen, but after the winter, both parties could become interested in stopping this devastating war.

Some of these scenarios have already subtly emerged at the beginning of November when markets picked up steam again on news of lower-than-expected US inflation and indications of a Chinese move away from zero Covid policies.

In our scenario, we have to wait until the second half of 2023 to see the economy cooling, with central banks likely to move towards easing monetary policy. In scenarios like this, stocks and bonds could rally.

The Fed's key interest rate is set to hit 5% in early 2023. The most aggressive monetary tightening in decades is already hurting the US and global economies. With higher borrowing costs hitting ratesensitive sectors, from real estate to autos, the US could enter an abnormal recession in the second half of next year, characterised by higher unemployment. If the Fed could be forced to hike rates as high

Report on activities of the Board of Directors (continued)

as 6%, the world's largest economy would slip into a longer and deeper recession. This risk reverberates worldwide, as most countries share the US inflation problem, with central banks behaving accordingly.

As far as the biotech sector is concerned, the pandemic has rekindled awareness of the importance of having effective, adequate and safe medicines. Investing in science, research, and innovation is now a priority for governments worldwide. President Joe Biden has launched a new initiative to encourage biotech production and research in the U.S., the latest move by the White House to boost domestic industry. The official said that the administration was aiming to expand domestic biomanufacturing capacity and that other countries, especially China, have been aggressively investing in the sector, posing risks to U.S. leadership and competitiveness.

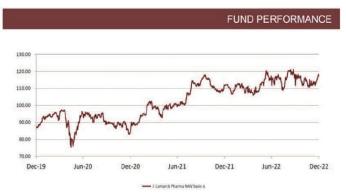

Inflation has a two-sided effect on Biotechnology shares. On one side, we invest in some biotech companies that have no revenue today and therefore are valued based on the present-day value of futures revenues adjusted for risk. If interest rates go up, we have to discount these future revenues to a larger extent resulting in lower values for the stock. On the other side, we are also invested in mature top-tier companies that will not have difficulty raising prices in this environment resulting in higher absolute cash flows. In fact, with zero or even negative inflation in recent years, the prices of almost 600 drugs have increased by an average of 5.2%. As biotech investors, there is not much we can do about inflation, but it is something to be aware of. Our philosophy is to mostly ignore it and focus entirely on a company's scientific merits because continued scientific progress will lead biotech stocks higher in the future. Although we have a challenging year ahead, we have never been more excited about advances in science happening almost every day.

SELECTRA INVESTMENTS SICAV - J. LAMARCK Pharma

Implemented investment strategy

The main objective of this Sub-Fund is to profit from increasing share prices in the pharmaceutical industry worldwide. The model portfolio consists of mature pharmaceutical corporations and innovative companies with pipelines of products in development in one or several markets. The investment policy will allow the Sub-Fund to increase total return through an active stock selection of companies that offer the most promising technology platforms.

During 2022, the performance of SELECTRA INVESTMENTS SICAV - J. LAMARCK PHARMA was 0.92% (share class A), with a volatility of 17.25% (20 days).

In September, the risk profile of the compartment migrated from category 5 to category 6 on increased volatility.

Market impact and considerations during 2022 for the asset class:

2022 was a year full of challenges, and the U.S. economy and stock market struggled in 2022. Economic uncertainty with China's zero covid policy, the effects of the Russia/Ukraine war and the highest inflation since the eighties, creating hawkish monetary policy tightening by the Federal Reserve; the S&P 500®

Report on activities of the Board of Directors (continued)

index was down 19.4%, and the Dow Jones Industrial Average decreased by 8.8%. But the Nasdaq suffered the most with a substantial 33.1% decline, with some of its most significant components, such as Amazon, Meta and Tesla, experiencing sharp declines of 50% or more during this downturn. However, one reason for this year's positive performance is a recent surge in merger and acquisition deals between biotech companies and large pharmaceuticals. In particular, Pfizer's acquisition of Biohaven announced in May, followed by other merger and acquisition agreements between GSK and Affinivax, Amgen and Chemocentryx and Horizon and Pfizer and Global Blood Therapeutics all show signs of stabilisation in biotech stocks.

2022 was also the year of transition from Trump to the Biden administration, and the industry took a cautious stance. The year has been marked by a few surprises in policy that have negatively affected investor sentiment. Anyway, the impact of the pharma industry on our lives cannot be overstated. Lives have been saved as the pandemic continued, families reunited, businesses restored, and economies rebuilt.

As of 31st December 2022, the top holdings of J. Lamarck Pharma are the following:

- Gilead Sciences Inc
- Novo Nordisk AS;
- Sanofi SA;
- Takeda Pharmaceutical Co Ltd;
- Merck & Co Inc.

Summary of relevant investments and divestments in the Pharmaceutical compartment that occurred in the period:

	TOP 5			
Buy	VIATRIS INC	-105.673,41	USD	
Buy	ORGANON & CO	-116.039,42	USD	
Sell	PFIZER INC	170.648,31	USD	
Sell	REGENERON PHARMACEUTICALS	118.276,74	EUR	
Sell	SANOFI	105.717,96	EUR	

We sold Regeneron Pharmaceuticals and Sanofi during the year to replenish a negative cash balance. Pfizer and other positions over the 5% threshold were sold to finance acquisitions in Organon and Viatris.

Contribution of winners and losers during 2022:

	Тор 5
44,76%	MERCK & CO. INC.
32,49%	ELI LILLY & CO
20,84%	NOVO-NORDISK A/S-SPONS ADR
19,36%	ABBVIE INC
18,23%	GILEAD SCIENCES INC

	Last 5
-70,49%	INTELLIA THERAPEUTICS INC
-66,59%	EDITAS MEDICINE INC
-58,38%	CARIBOU BIOSCIENCES INC
-46,36%	CRISPR THERAPEUTICS AG
-42,05%	TARO PHARMACEUTICAL INDUS

Report on activities of the Board of Directors (continued)

Merck & Co had a very solid run-up during the year. It was the best-performing large US pharma of 2022, with a return of 44.7%. It continued to beat EPS expectations, and a significant increase in sales of the company's vaccines and oncology division offset the losses from the lack of sales of its Covid antiviral drug Lagevrio.

With a year-to-date performance of 34%, Eli Lilly (LLY) had the second-best return of the year. Most analysts stated that the stock was already overvalued at the beginning of the year. Still, a correction has not materialised, quite the contrary, as it received approval for diabetes medication Mounjaro (tirzepatide) in May. Further depth in its pipeline contributed to a positive momentum during the year. Novo Nordisk posted strong sales and earnings growth for the year, especially in the obesity and diabetes market, where the company has a competitive advantage. Abbvie registered strong stock performance relative to the sector and rose 19.3%. Gilead Sciences' stock increased substantially at the end of October after the approval of Yescarta, a treatment for large B-cell lymphoma and high-grade B-cell lymphoma and after it raised full-year 2022 Outlook to \$25.9B - \$26.2B, followed by upgrades from Piper Sandler and Barclays.

CRISPR stocks, like Intellia, Editas, CRISPR Therapeutics and Caribou, had a stellar performance in 2020 and 2021 but were among the worst performers within the Sub-Fund this year. CRISPR are earlystage biotech companies with enormous potential but are still years away from having commercial products available to patients. First, safety concerns have to be addressed, as we have seen with Intellia: The company published extraordinary results in September in a rare and deadly swelling disorder, but NTLA has been trading lower since on new safety concerns as one patient experienced slightly elevated liver enzymes.

Sun Pharma holds the majority of shares in Taro Pharmaceuticals, and although we think Taro is undervalued) with PE being depressed in the 10x for several years now, despite its excellent operational performance.

Outlook as we advance 2023:

We expect global growth to deteriorate until July 2023. Markets will then increasingly focus on the recovery beyond, although investors shouldn't expect everything to go "back to normal" immediately. Higher inflation and a weaker economic environment mean that not all companies will thrive.

The Fed could deliver a "soft landing" with the labour market likely to prove resilient. Warm weather could save Europe from an energy-cost-induced recession. China has basically ended the lockdowns that have slowed the recovery from the pandemic. We expect Chinese consumers to revenge buy consumer goods, a pattern we have seen in the rest of the world after easing Covid restrictions. This means higher inflation is here to stay for the rest of 2023, with the FED and the BCE acting with tightening monetary policy.

A positive for the markets in 2023 could be Russia and Ukraine beginning peace talks. At this moment, there is no indication for this to happen, but after the winter, both parties could become interested in stopping this devastating war.

Some of these scenarios have already subtly emerged at the beginning of November when markets picked up steam again on news of lower-than-expected US inflation and indications of a Chinese move away from zero Covid policies.

In our scenario, we have to wait until the second half of 2023 to see the economy cooling, with central banks likely to move towards easing monetary policy. In scenarios like this, stocks and bonds could rally.

The Fed's key interest rate is set to hit 5% in early 2023. The most aggressive monetary tightening in decades is already hurting the US and global economies. With higher borrowing costs hitting ratesensitive sectors, from real estate to autos, the US could enter an abnormal recession in the second half of next year, characterised by higher unemployment. If the Fed could be forced to hike rates as high as 6%, the world's largest economy would slip into a longer and deeper recession.

This risk reverberates worldwide, as most countries share the US inflation problem, with central banks behaving accordingly.

Report on activities of the Board of Directors (continued)

As far as the pharma sector is concerned, the pandemic has rekindled awareness of the importance of having effective, adequate and safe medicines. Investing in science, research, and innovation is now a priority for governments worldwide. President Joe Biden has launched a new initiative to encourage biotech production and research in the U.S., the latest move by the White House to boost domestic industry. The official said that the administration was aiming to expand domestic biomanufacturing capacity and that other countries, especially China, have been aggressively investing in the sector, posing risks to U.S. leadership and competitiveness.

Inflation has a two-sided effect on Pharma shares. If interest rates go up, we have to discount these future revenues to a larger extent resulting in lower values for the stock. On the other side, we are also invested in mature top-tier pharmaceutical companies that will not have difficulty raising prices in this environment resulting in higher absolute cash flows. In fact, with zero or even negative inflation in recent years, the prices of almost 600 drugs have increased by an average of 5.2%. As pharma investors, there is not much we can do about inflation, but it is something to be aware of. Our philosophy is to mostly ignore it and focus entirely on a company's scientific merits because continued scientific progress will lead pharma stocks higher in the future. Although we have a challenging year ahead, we have never been more excited about advances in science happening almost every day.

SELECTRA INVESTMENT SICAV - ICAM FIRST

With global equities concluding 2022 with very large declines, especially for the equity classes most affected by the tightening policies of major central banks, looming threats of recession, the supply crisis and various adverse geopolitical circumstances (most noticeable of which were the conflict between Ukraine and Russia and the shutdowns resulting from the Coronavirus in China), and with the bond segment moving in the same direction as the equities, ICAM FIRST Sub-Fund also finished the year with not inconsiderable losses.

In fact, in this context, ICAM First Sub-Fund ended the year with a negative performance of -17.06%. The final figure was made lighter by the positive performance in Q4 (+1.39%), mainly due to a rebound in equities and partly due to a positive trend in bonds in the very latter end of the year.

After a difficult year, in the last quarter the Sub-Fund tried to take advantage of all the weakness suffered in many market areas precisely to rebalance the overall portfolio profile: on the equity side, moving back to growth names (deeply undervalued on many metrics as P/E ratios, balance sheet, momentum among others) with absolutely convincing business models and balance sheets, and on the other side taking advantage of all the downturn in the bond market (corporates and high-yield) where many returns returned after a long time. The rebalancing took place by making many transactions in order to mediate the entry levels of the various securities held in the portfolio.

In the processes of asset selection and management, the Sub-Fund, using a top-down approach, seeks to select, through a complex stock picking process, 'quality' stocks, i.e. those stocks with clear and established business models, healthy margins and balance sheet indicators, and possibly good momentum, in order to reduce overall volatility and maintain a VaR of less than 10%.

Summary of the main KPIs used by the Sub-Fund VAR: Portfolio volatility and risk levels are analysed through Value at Risk. The value must remain consistently below 10 %, but around a value of 8.5% active action is taken to reduce risk.

PE & FAIR VALUE: Regarding the selection of risky securities, the PE ratio is one of the main factors of consideration. Securities with appropriate valuations are clearly favoured. This analysis is carried out on both stocks and indexes.

BALANCE SHEET: Profitability ratios, such as ROE or ROI, liquidity ratios, such as current ratio or quick ratio, and finally capital balance (or solvency) ratios, such as short/medium/long term debt levels.

MOMENTUM: Among the main technical and tactical aspects in the medium and short term, the momentum factor is taken into account in portfolio recalibrations, both for speculative purposes and for asset price mediation. Again, the analysis is carried out on both stocks and indexes.

The market will be very volatile in the coming months due to multiple issues, but on the US side the bottom has been reached and could be exploited. On the European side, the picture is a bit more mixed due to political issues and the war between Russia and Ukraine. Historically, European markets are more vulnerable to inflationary shocks and margin pressure, so the Sub-Fund will act cautiously in terms of individual stock selection.

Report on activities of the Board of Directors (continued)

On the fixed income side, the Sub-Fund manager took advantage of all the corrections in the bond market (both corporate and high yield) by reallocating funds towards the more dynamic part of the credit universe, in the hope of obtaining a better carry without incurring significant default risk.

In the current market framework, last macroeconomic data releases seems providing encouraging signals that central banks are succeeding in slowly easing inflationary pressure, despite still not leading to severe negative impacts on economy leading indicators and labor market (mainly in the US). There is an increasing consensus among analysts and strategists of a favorable perspective for a rebound in 2023 of equity markets – especially for Emerging Markets and China – and with interesting yield opportunities among IG bond segment, especially in Europe. The energy crisis, weakening EUR/USD and heightened systemic risk have led to the undiscriminated dislocation of the EU credit market. Credit market reflected deteriorating economic backdrop faster than equity market. Both IG and HY credit spreads have widened considerably in the last 12 months and look increasingly attractive compared to historical peaks. While a default rate increase could be a reasonable scenario among EU HY issuers, EU IG spreads depict a better risk/return and a very interesting yield perspective.

SELECTRA INVESTMENT SICAV - MONEIKOS BALANCED FUND

The Moneikos Balanced Fund Sub-Fund posted a negative performance of -14.06% in the year 2022. After enduring a turbulent first half of the year, in terms of results, and having recovered a relatively few points during the third quarter, the Sub-Fund once again ended the quarter in the negative, dropping - 4.31% (in EUR terms). Much of the performance in 2022 can be attributed to growth-style equity positioning, which, given the macro scenario, struggled particularly badly, but not only, during the year, the Sub-Fund experienced challenging performance across a number of sub-strategies: Equity Market Neutral, Equity Long/Short, Global High Yield, Directional Equities and Event-Driven. Disappointingly, some of the Sub-Fund's key liquid-alternative allocations, i.e. Equity Market Neutral and Equity Long/Short, generated negative performance, which was compounded by the underperformance of the allocation to Directional Equities. In the most recent quarter, for example, the equity long/short strategy (Veritas Global Real Return) and the equity market neutral strategy (Lumyna Sandbar Global Equity Market Neutral) were the main performance detractors; registering performances of -5.9% and -8.9% respectively.

On the other hand, during the last quarter the Sub-Fund benefited from the allocation to the Macro strategy (M&G Episode Macro Fund, +1.6% for Q4, +14.6% for 2022), as well as the allocation to commodities (Lumyna BOFA MLCX Commodity Alpha UCITS, +5.2% for Q4, +4.1% for 2022). Summary of the main KPIs used by the Sub-Fund

MEDIUM-TERM INFLATION:

The inflationary environment relative to target levels is examined, identifying the main reasons and drivers.

GROWTH SLOWDOWN/RECESSION IN DEVELOPED MARKETS:

The economic outlook of developed economies on a global scale is analysed first, and emerging economies second. The analysis of GDP growth rate plays a key role. In the short term, China's economic status with the reopening and easing of zero covid policies is analysed in detail. CENTRAL BANK REFERENCE RATES:

Current monetary policies implemented by major central banks are analysed. The most important rates examined are those of the FED and the ECB.

During Q4, Moneikos Balanced Fund was active in the addition of five new positions:

- It has been opened and increased a position in the Schroder Wellington Pagosa Fund, a multistrategy constant return fund recommended by Wellington Management.
- It has been opened a position in the iShares 0-5 Year TIPs ETF, believing that inflation expectations will continue to rise over the next 12-18 months.
- It has been opened positions in the VanEck Gold Miners ETF and the Global X Silver Miners ETF. The Sub-Fund views precious metals, gold and silver, as a hedge to traditional global monetary systems and fiat currencies. The Sub-Fund expects precious metals to perform well in the face of rising inflation and negative real interest rates. Therefore, for this reason, the Sub-Fund expects gold and silver mining companies to perform well.

Report on activities of the Board of Directors (continued)

- It has been opened a position in Liontrust GF Tortoise, a high conviction flexible equity long/short manager that has been able to participate in market rises and also protect against declines.

During the same period, the Sub-Fund closed two positions, with the aim of reducing exposure to higher duration risk:

- It has been liquidated the Guggenheim Core Fixed Income Fund
- It has been liquidated the Wellington Global Credit Plus Fund

In any case, there were no pre-trade and post-trade incidents and no operational errors during the just concluded year.

The Sub-Fund expects markets to remain volatile, with a range and potentially higher volatility. Market participants continue to digest the medium-term inflation trajectory and growth slowdown/recession in developed markets, while remaining confident that central banks, led by the US Federal Reserve, will soon reach the terminal interest rates of this cycle. The reopening of the Chinese economy is a catalyst that is being closely monitored. While remaining cautious, the Sub-Fund invested in new positions in the Moneikos Balanced Fund to offer greater diversification and in areas where they expect a very attractive upside-to-downside (e.g. precious metal miners, US 0-5 year TIPs) and also in managed funds that we expect to do well in a volatile market environment. The Moneikos Balanced Fund will continue to seek and evaluate new investments that can diversify the existing allocation. Aiming to provide returns that are weakly correlated to global equities and bonds, Moneikos Balanced Fund's allocation will remain skewed towards UCITS alternative cash funds and an above-average cash weighting, with less exposure to equity and directional credit funds for 2023.

SELECTRA INVESTMENT SICAV - SHIELD OPPORTUNITIES FUND

The economic backdrop has been largely characterized by a growth consolidation in the wake of the COVID-19 pandemic, coupled with rapidly rising inflation. This rebound in economic conditions has been helped by the lagged impact from loose monetary and fiscal policies, as well as elevated capital expenditures by businesses. The output levels of most economies are above their pre-pandemic peaks, while the previous high degree of unemployment in the labour market has been largely absorbed. Measures in support of aggregate demand have allowed economies to heal following the pandemic but have also been a contributing factor to intensifying inflation pressures. The steep and broad-based rise in price levels has been exacerbated by global supply chain bottlenecks, a disruption in commodity markets due to geopolitical conflict and widespread labour shortages. Facing the highest rates of inflation in decades, many central banks have rolled back pandemic-related asset purchase programs and commenced their rate-hiking cycles. This comes as monetary authorities are increasingly facing a trade-off between providing support for growth and maintaining their inflation-targeting credibility. The Federal Reserve and the European Central Bank are expected to continue moving largely in lockstep by continuing to raise interest rates over the coming year. On top of disappointing economic and market news, investors were further stressed by war in Ukraine, concerns about Chinese intentions in Taiwan, and surging prices at the supermarket and the gas pump. While they are two distinct challenges, these factors are directly linked. At the start of the year, few would have anticipated that an active ground war in central Europe would dominate headlines. But the Russian invasion of Ukraine has shaken up the geopolitical and economic order. NATO allies have enacted severe sanctions on Russia and a growing number of global companies have shuttered operations there. The war also has a significant impact on inflation. Most visibly, the war disrupted distribution of Russian oil and gas. A spike in demand from OPEC producers has resulted in record high energy prices. This at a time when the global economy was humming along in a post-pandemic recovery and energy demand was already growing. Inflationary pressure has not been limited to oil. Food prices have soared as Ukraine, the breadbasket of Europe, has had to direct its efforts to defending its borders rather than growing food that fills plates across the continent. The year finished with what some may call the burst of the cryptocurrency frenzy. It represented the end of bull markets, which had rebounded quickly from Covid19, and most of us agree that a recession is likely in 2023.

The Sub-Fund delivered a negative return of 23.21% for share class A in 2022 due to its exposures to technology asset classes, which recorded negative returns in global equities and negative returns in

Report on activities of the Board of Directors (continued)

Fixed Income amid rising inflation and interest rates. Our investments in Consumer Staples and Healthcare, two defensive sectors, were the main drivers behind the sector allocation effect during the year. Our top-owned contributors and detractors for the month were: Tomra Systems, Novo Nordisk and Helvetia and on the negative side Marvell Technology, Nvidia and ASML Holding. With the start of a new year, the market will remain tuned in to the same themes that animated it in 2022: the path of inflation, the state of the labour market and the central bank policy response. The big development at the US Federal Reserve was the release of the December FOMC minutes which showed that while the commitment to fight inflation remained high, policymakers felt it was an appropriate time to dial back the pace of rate increases. Latest US economic data continued to offer more hope of a soft landing – a significant tailwind for risk sentiment. Despite the many challenges, we are optimistic for better days in the second half of the year. On average, we project a market rebound in most major indexes from nearbear market territory to post gains by the start of the new year. In Europe, thanks to a fall in the price of power and natural gas, the risks of a harsh recession have dissipated. Leading indicators also support the notion of a milder and shorter recession in Europe.

SELECTRA INVESTMENT SICAV - BEST OF SRI BALANCED

Best of SRI Balanced was a Sub-Fund dedicated to those investors who want to gain a direct exposure to sustainable investments, through a mix of fixed income and equity instruments. The main objective of the Sub-Fund was to generate a capital appreciation over the medium to long term by investing only in UCITS and other UCIs that integrate ESG considerations in their investments processes.

During the period from 1st January 2022 until 30th June 2022 (the liquidation date), the Sub-Fund achieved a negative performance of -15.08% denominated in EURO, and a performance of -9.00% for the Q2 2022. It is important to note that the Sub-Fund was liquidated at the end of June 2022.

The markets were knocked hard by the conflict, and European equities in particular were the worst performers in the first half of the year. The Sub-Fund suffered the most due to its overweight European equities. Fixed income also saw a high level of volatility, while developed market bonds pared losses as investors sought safe haven assets.

Russia's invasion of Ukraine, historical high inflation in US and Eurozone, FED and ECB quantitative tightening and high commodity prices have raised investor's concerns putting strong downward pressure on markets.

Both fixed income and equity markets continue the bearish trend. Supply bottlenecks are still a problem and are likely to persist throughout 2022, while oil and gas prices will tend to rise and remain at high levels for a long time. Soaring oil and gas prices and the need for Europe to regain sovereignty over energy supply could also have an impact on the issue of clean and renewable energy. Added to this is the fact that the current sanctions imposed on Russia are having a tangible effect on the European market in particular. Indeed, in the short to medium term, Europe is likely to underperform global markets, unlike the US, which is expected to be more insulated from the conflict. Volatility and uncertainty offer attractive opportunities in times of market turbulence.

It is also important to point out that Best of SRI Balanced has implemented an ESG-conscious investment policy up to the liquidation date, registering an ESG Fund Score of 3.83 out of 5 in the last period.

Luxembourg, 15th March 2023

The Board of Directors

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the financial statements of SELECTRA INVESTMENTS SICAV (the "Company") and of each of its subfunds, which comprise the statement of net assets and the statement of investments and other net assets as at 31st December 2022 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company and of each of its sub-funds as at 31st December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23rd July 2016 on the audit profession (Law of 23rd July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23rd July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "reviseur d' entre prises agree" for the Audit of the Financial Statements" section of our report. We are also independent of the Company in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Company is responsible for the other information . The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *"reviseur d'entreprises agree"* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Company for the Financial Statements

The Board of Directors of the Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Company is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Company either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "reviseur d'entreprises agree" for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *"reviseur d'entreprises agree"* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23rd July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Deloitte.

As part of an audit in accordance with the Law dated 23rd July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Company.
- Conclude on the appropriateness of the Board of Directors of Company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *"reviseur d'entreprises agree"* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *"reviseur d'entreprises agree"*. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence.

Notes to the financial statements as at 31st December 2022

Note 1 - General information

SELECTRA INVESTMENTS SICAV (the "Company") is organised as a "*société d'investissement à capital variable*" under the Luxembourg laws. It qualifies as an Undertaking for Collective Investment in Transferable Securities under the amended Council Directive 2009/65/EC and is governed by Part I of the amended Law of 17th December 2010 (the "2010 Law") relating to Undertakings for Collective Investment.

The financial year ends on 31st December of each year.

The Prospectus, the Articles of Incorporation, the KID, the most recent annual reports including audited financial statements and unaudited semi-annual reports as well as the Net Asset Value per Share and the subscription and redemption prices of the Sub-Funds are available and may be obtained free of charge at the registered office of the Company.

At the date of the financial statements, the following Sub-Funds are active:

- SELECTRA INVESTMENTS SICAV - J. LAMARCK BIOTECH	in EUR
- SELECTRA INVESTMENTS SICAV - J. LAMARCK PHARMA	in EUR
- SELECTRA INVESTMENTS SICAV - ICAM FIRST	in EUR
- SELECTRA INVESTMENTS SICAV - MONEIKOSBALANCED FUND	in EUR
- SELECTRA INVESTMENTS SICAV - SHIELD OPPORTUNITIES FUND	in EUR
- SELECTRA INVESTMENTS SICAV - BEST OF SRI BALANCED	in EUR
(liquidated on 30th June 2022)	

Note 2 - Significant accounting policies

a) Presentation of the financial statements

The financial statements of the Company are prepared in accordance with Luxembourg legal and regulatory requirements concerning undertakings for collective investment and with generally accepted accounting principles in Luxembourg.

The financial statements of the Company have been prepared on a going concern basis except for the following liquidated Sub-Fund : SELECTRA INVESTMENTS SICAV - BEST OF SRI BALANCED (liquidated on 30th June 2022).

- b) Valuation of assets
 - 1) The value of cash and deposits, drafts and bills payable on demand, receivables, expenditures paid in advance, dividends and interests announced or due but not yet received, is constituted by the nominal value of these assets, unless it appears unlikely that this value can be realized. In this case the value is determined by subtracting an amount deemed to be appropriate by the Board of Directors of the Company to reflect the real value of these assets.
 - 2) The valuation of any transferable securities or money market instruments or derivatives traded or listed on a stock exchange is made on the basis of the closing price as at the Valuation Day unless such price is not representative.
 - 3) The value of any transferable securities or money market instruments traded on another regulated market is determined on the basis of the closing price as at the Valuation Day.
 - 4) If transferable securities and money market instruments on a dedicated Valuation Day are neither officially traded nor listed on an exchange or regulated market, or in the case where, for securities and money market instruments officially listed or traded on a stock exchange or another regulated market, the price as determined pursuant to paragraphs 2 and 3 here above

Notes to the financial statements (continued) as at 31st December 2022

is not representative of the true value of such transferable securities or money market instruments, the valuation is made on the basis of their likely value of realisation, estimated with due care and good faith by the Board of Directors of the Company.

- 5) Shares/units of UCITS and other UCIs are valued on the basis of their last available Net Asset Value at the Valuation Day.
- c) Acquisition cost of securities in the portfolio

The acquisition cost of the securities held by each Sub-Fund that are denominated in currencies other than the reference currency of the Sub-Fund is converted into this currency at the exchange rate prevailing on the date of purchase.

d) Net realised gain/(loss) on securities portfolio

The realised gains and losses on securities portfolio are calculated on the basis of the average acquisition cost and are disclosed net in the statement of operations and other changes in net assets.

e) Investment portfolio income

Dividend income is recorded at the ex-date, net of any withholding tax.

Interest income is accrued on a prorata temporis basis, net of any withholding tax.

f) Valuation of forward foreign exchange contracts

Open forward foreign exchange contracts are valued at forward market rates for the remaining period from valuation date to the maturity of the contracts. Net unrealised gains or losses of open contracts are disclosed in the statement of net assets. Net variation of unrealised gains or losses and net realised gains or losses are disclosed in the statement of operations and other changes in net assets.

g) Valuation of futures contracts

	I	up to 0.20	0.20

No Advisory fees are charged for the Sub-Funds SHIELD OPPORTUNITIES FUND and BEST OF SRI BALANCED (liquidated on 30th June 2022).

> Distribution fee

The Distribution Fees disclosed under the item "Other administration costs" in the statement of operations and other changes in net assets are expressed as a percentage of the total net assets of the Sub-Fund and are calculated and payable at the end of each month to the Management Company, in accordance with the annual rates below:

Sub-Funds	Share Class	Maximum rate (% p.a.)	Effective rate (% p.a.)
- ICAM FIRST	В	up to 0.85	0.85
- MONEIKOS BALANCED FUND	A	1.30	1.30
	I	0.55	0.55

No Distribution fees are charged for the Sub-Funds J. LAMARCK BIOTECH, J. LAMARCK PHARMA, SHIELD OPPORTUNITIES FUND and BEST OF SRI BALANCED (liquidated on 30th June 2022).

Note 4 - Management fees of the target funds

The aggregate maximum annual management fees that will be charged by the underlying UCITS in which the Sub-Funds invest is 3% of their aggregate net asset values per annum.

Note 5 - Management fee retrocession

Management fee retrocessions received by the Company and related to its investments in UCITS or other UCIs are disclosed under the "Other commissions received" in the statement of operations and other changes in net assets.

Note 6 - Performance fee

In addition to the Management fee or the Advisory fee, the Investment Manager and the Investment Advisor are entitled to receive a performance fee.

Notes to the financial statements (continued) as at 31st December 2022

The detailed calculation method of the performance fee is described in the current prospectus.

> For the Sub-Fund J. LAMARCK BIOTECH

At the end of each year, the Investment Advisor shall be entitled to receive a performance fee up to 20% of the appreciation of the Net Asset Value per Share over the reference period, i.e. the twelve-month period between the first Business Day and the last Business Day of each calendar year (January-December). The frequency of Crystallization is once per year.

The calculation of the Performance Fee shall be construed on the High Watermark (HWM) methodology, which is aimed at preventing investors from paying performance fees in case of poor performance and, furthermore, from paying twice a performance fee on the same performance. The HWM is the last Net Asset Value per Share at which the Performance Fee was paid.

> For the Sub-Fund J. LAMARCK PHARMA

At the end of each year, the Investment Advisor shall be entitled to receive a performance fee up to 10% of the appreciation of the Net Asset Value per Share over the reference period, i.e. the twelve-month period between the first Business Day and the last Business Day of each calendar year (January-December). The frequency of Crystallization is once per year.

The calculation of the Performance Fee shall be construed on the High Watermark (HWM) methodology, which is aimed at preventing investors from paying performance fees in case of poor performance and, furthermore, from paying twice a performance fee on the same performance. The HWM is the last Net Asset Value per Share at which the Performance Fee was paid.

For the Sub-Fund ICAM FIRST

No performance fee is applicable.

> For the Sub-Fund MONEIKOS BALANCED FUND

At the end of each year, the Investment Manager shall be entitled to receive a Performance Fee from the Sub-Fund up to 15% of the appreciation of the Net Asset Value per Share over the reference period, i.e. the twelve-month period between the first Business Day and the last Business Day of each calendar year. The frequency of Crystallization is once per year. The High Watermark (HWM) first reference period will be the period starting on approval of the Sub-Fund and ending on the last Business Day of the year.

The calculation of the Performance Fee shall be construed on the HWM methodology, which is aimed at preventing investors from paying performance fees in case of poor performance and, furthermore, from paying twice a performance fee on the same performance. The HWM is the last Net Asset Value per Share at which the Performance Fee was paid.

> For the Sub-Fund SHIELD OPPORTUNITIES FUND

At the end of each year, the Investment Manager shall be entitled to receive a Performance Fee from the Sub-Fund equal to 20% of the appreciation of the Net Asset Value per Share over the reference period (for all Share Classes, except for the Share Class "H", for which it will be up to 20%), i.e. the twelve-month period between the first Business Day and the last Business Day of each calendar year (January-December). The frequency of Crystallization is once per year. The calculation of the Performance Fee shall be construed on the High Watermark (HWM) methodology, which is aimed at preventing investors from paying performance fees in case of poor performance and, furthermore, from paying twice a performance fee on the same performance. The HWM is the last Net Asset Value per Share at which the Performance Fee was paid.

Notes to the financial statements (continued)

as at 31st December 2022

> For the Sub-Fund BEST OF SRI BALANCED (liquidated on 30th June 2022)

At the end of each year, the Investment Manager shall be entitled to receive a performance fee up to 15% of the appreciation of the Net Asset Value per Share over the reference period, i.e. the twelve-month period between the first Business Day and the last Business Day of each calendar year (January-December). The frequency of Crystallization is once per year.

The calculation of the Performance Fee shall be construed on the High Watermark (HWM) methodology, which is aimed at preventing investors from paying performance fees in case of poor performance and, furthermore, from paying twice a performance fee on the same performance. The HWM is the last Net Asset Value per Share at which the Performance Fee was paid.

At the date of the financial statements, the performance fee is recorded for the following Sub-Funds and amounts to:

Sub-Fund	Share class	Performance fee amount in Sub-Fund currency		Performance fee ratio in % of average total net assets
- J. LAMARCK BIOTECH	А	5,613.96		0.01%
	В	113,272.67		0.24%
	D	1,741.68		0.29%
		120,628.31	EUR	
- J. LAMARCK PHARMA	Α	1,685.42		0.10%
	В	15,278.34		0.23%
	D	66.37		0.05%
		17,030.13	EUR	
- SHIELD OPPORTUNITIES FUND	A EUR	0.90		0.00%
	- -	0.90	EUR	

The performance fees payables are disclosed in the statement of net assets of the concerned Sub-Funds under the item "Expenses payable".

Note 7 - Subscription, redemption and conversion fees

After the initial subscription period, Shares of the Company are issued at a price corresponding to the Net Asset Value per Share of the relevant Sub-Fund plus a subscription fee of maximum 3% in favour of the General Distributor, where applicable.

There are no redemption fees except for the Share Classes A1, A2, B1, B2 for the Sub-Fund BEST OF SRI BALANCED (liquidated on 30th June 2022) which are of up to 1% during the first twelve months after the related subscription.

A conversion fee of 1% of the Net Asset Value of the initial Sub-Fund will be levied in favour of such initial Sub-Fund.

Notes to the financial statements (continued) as at 31st December 2022

Note 8 - Subscription duty ("Taxe d'abonnement")

The Company is governed by Luxembourg law.

Pursuant to the legislation and regulations in force, the Company is subject to an annual "*taxe d'abonnement*" of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

Pursuant to Article 174 (2) of the 2010 Law, this rate is reduced to 0.01% for Share classes reserved to institutional investors.

Pursuant to Article 175 (a) of the 2010 Law, the net assets invested in undertakings for collective investment already subject to the "*taxe d'abonnement*" are exempt from this tax.

Note 9 - Other expenses

The item "Other expenses" disclosed in the statement of operations and other changes in net assets is mainly composed of the liquidation fees.

Note 10 - Statement of changes in investments

The statement of changes in investments for the reporting year is available free of charge at the registered office of the Company as well as at the Italian paying agents, the French paying agent, the Swiss representative and the Swiss paying agent.

Note 11 - Cross investments

As at 31st December 2022, the Sub-Fund J. LAMARCK BIOTECH invests in the Sub-Fund J. LAMARCK PHARMA as described below:

Sub-Fund	Description	Currency	Quantity	Market value	% of total net assets
SELECTRA INVESTMENTS SICAV - J.LAMARCK BIOTECH	Selectra Inv SICAV J. Lamarck Pharma A EUR Cap	EUR	14,707.465	1,664,443.81	1.70

The combined statement of net assets has not been adjusted to remove the impact of the above.

The commission on subscriptions and redemptions detailed in note 7 and the Management Company fees and Advisory fees detailed in note 3 are not applied to these assets.

Note 12 - Prepaid subscriptions

Subscriptions received prior to the year-end are credited to the "Prepaid subscriptions" account until the next subscription date.

Note 13 - Forward foreign exchange contracts

As at 31st December 2022, the following Sub-Fund is committed in the following forward foreign exchange contract with QUINTET PRIVATE BANK (EUROPE) S.A.:

Note 15 - Short Options

As at 31st December 2022, the Company is not committed in short options contracts.

Note 16 - Valuation of investment

As at 31st December 2022, the Sub-Fund SELECTRA INVESTMENTS SICAV - SHIELD OPPORTUNITIES FUND holds a position of 35,000 shares of NMC Health Plc "NMC Health".

Trading in the shares of NMC Health on the London Stock Exchange was suspended on 27th February 2020. On 10th March 2020, NMC Health announced its debt position was materially above the last reported numbers at around USD 5bn and on 23rd March 2020 that debt was estimated to be around USD 6.6bn.

On 6th April 2020 NMC Health announced that it had been informed by lawyers acting for Abu Dhabi Commercial Bank PJSC ("ADCB") that ADCB had filed an application with the High Court of Justice, Business and Property Courts of England and Wales, Insolvency and Companies List (ChD) for the appointment of administrators in respect of the Company under paragraph 12(1)(c) of Schedule B1 to the Insolvency Act 1986 (the "Application"). The Application was successful, and Joint Administrators (the "Administrators") were appointed on 9th April 2020. Concerning 2021, the United Kingdomregistered NMC Healthcare PLC and UAE-registered NMC Healthcare Ltd remain in administration while restructuring and legal issues related to these entities are resolved. No further updates for the reporting period.

The Board of Directors of the Company based on these information decided to value this security at 0 GBP as at 31st December 2022.

Notes to the financial statements (continued) as at 31st December 2022

As at 31st December 2022, the Sub-Fund SELECTRA INVESTMENTS SICAV - SHIELD OPPORTUNITIES FUND holds a position of 9,049 securities of Webuild SpA Call Wts 02.08.30 valued at 0 because the securities are unlisted anti-dilutive warrants and virtually no warrants are available for exercise as at 31st December 2022.

Note 17 - Events

By circular resolution dated 5th May 2022 the Board of Directors of the Company resolved to liquidate the Sub-Fund SELECTRA INVESTMENTS SICAV - BEST OF SRI BALANCED and to suspend all trading activities of the Sub-Fund as from 12th May 2022. The aforementioned Sub-Fund has been liquidated as of 30th June 2022.

War in Ukraine

The Company has monitored the situation with particular attention to the latest approved international financial sanctions during the entire year 2022. At the date of approval of these financial statements, the Board of Directors of the Company, to the best of its knowledge and considering the swiftly evolving situation, deems the events aforementioned as non-affecting the going concern of the Company and the financial statements as of 31st December 2022.

Note 18 - Subsequent events

Following a circular resolution dated 2nd January 2023, Andrea ARATA has been appointed as Director of the Company.

Additional information (unaudited) as at 31st December 2022

1 - Risk management

As required by Circular CSSF 11/512 as amended, the Board of Directors of the Company needs to determine the global risk exposure of the Fund by applying either the commitment approach or the VaR ("Value at Risk") approach.

The Board of Directors of the Company decided to adopt the VaR approach as a method of determining the global exposure for the following Sub-Funds:

Sub-Fund	Global Exposure method	Limit
J. LAMARCK BIOTECH	Relative VaR	200%
J. LAMARCK PHARMA	Relative VaR	200%
ICAM FIRST	Absolute VaR (99%, 20 business days)	10%

VaR analysis is based on a statistical analysis of movements in the relevant market over a specified historial observation period of one year, in order to identify the potential losses which may occur during a specified holding period.

The following VaR values and leverage level have been calculated during 2022:

Sub-Fund	Lowest	Highest	Average	Leverage (average sum of notional)
J. LAMARCK BIOTECH	153.87%	183.59%	173.27%	0%
J. LAMARCK PHARMA	164.04%	196.40%	181.92%	0%
ICAM FIRST	6.24%	12.37%	8.31%	0%

For the other Sub-Funds, the Board of Directors of the Company decided to adopt the Commitment approach as a method of determining the global exposure. The following Commitment levels have been calculated during 2022 for the following Sub-Funds:

Sub-Fund	Leverage (average Commitment)
BEST OF SRI BALANCED (liquidated on 30th June 2022)	0%
MONIEKOS BALANCED FUND	18.58%
SHIELD OPPORTUNITIES FUND	57.15%

2 - Remuneration
